## Our Mission & Process

### Women in Leadership Changing the World

The Flourish Conference for Women in Leadership is an immersive leadership summit designed to empower and equip women in corporate leadership positions to flourish in their organizations and in their professional and personal lives. Studies show that when women have leadership support, a strong community of collaborative partners within and outside of their organizations, and a “balanced” approach to personal and professional fulfillment, their companies, communities and families flourish.

A woman who is “flourishing” is recognized as a leader in her field, demonstrates a strong commitment to community engagement and has wonderful relationships that reflect her strong character. She is brilliant, caring, committed and unapologetically successful. She is always looking for another way to give of herself and to make the world a better place.

“

The Flourish Conference for Women in Leadership was an extraordinary experience for the EY brand to connect to some of the top women in the marketplace – to exchange ideas, insights and strategies for success. For me, it not only provided knowledge from the best minds, but it also allowed the women in the room to engage in a non-threatening environment. I left the conference and the retreat energized about my future prospects – both professionally and personally.
